## Technical Features

**Designation :** RIPLIGHT SYSTEM HARNESS

**Reference:**

**HA093**

**Description :**

Full body harness, RIPLIGHT system including 2 attachment points. The harness is composed of a 45 mm width polyester webbing and a double system that enables the elasticity. 5 automatic buckles with 3 automatic buckles in light alloy.

SINGLE SIZE

**Key features :**

Your second skin. « RIPLIGHT System » gives life to the harness for your comfort, whatever your position, and without any trouble. The harness fits perfectly to the user's morphology and to the different positions taken during the use. Patented system.

**Benefits :**

- Light, extensible, comfortable.
- 2 lateral plates that enable to place correctly the crossing of the webbings
- Special sewing on the webbing on the legs
- Big back D ring in light alloy that makes the attachment easier.
- Protection sheath for front attachment
- Easy adjustment and easy to put on.
- Lower back support thanks to wide back pad
- 2 large light alloy side attachments
- 2 accessory holder rings

**Use recommandation :**

Recommended for longlasting or frequent works on height.

**EC type examination certificate N° :**
